Thematic investing is gaining popularity

- The world is changing constantly, sometimes rapidly. Investment decisions are being impacted by long-term *megatrends*, which transcend into individual *themes*.
- The **Manulife Global Thematic Fund** allows investors to participate in the opportunities arising from structural shifts, typically driven by *innovation, demographic change, resources scarcity* or *urbanization*.
- Active management is a prerequisite for successful thematic investing to control timing, diversification and thematic purity of the investment.

Performance of the strategy is not guaranteed and losses remain possible.

Investing in the world ahead

Themes provide a better fit for the world of today

Many stocks cannot be assigned to a classic sector, but have a high sensitivity to a megatrend or theme.

Megatrends and themes

Within the megatrends, themes and topics can be defined. These can be at different points in the investment cycle and have a shorter time horizon than the megatrend.

Chance of attractive returns

Investment themes are long term and offer a chance for outperformance. It is important to identify the themes as well as to invest in the key beneficiaries.

The right timing plays an important role

Investment themes run in cycles. The attractiveness of the megatrend or a theme has to be constantly checked. Timing plays an important role in investment success.

Megatrends influence how consumers and businesses see the world today

Megatrend: Urbanization

Example of a Theme: Infrastructure

- The theme includes a wide range of companies including raw materials producers, suppliers of building products, construction companies, providers of equipment as well as related areas.
- Two topics of interest within Infrastructure are:
 - Infrastructure Super-Cycle: Investments in public infrastructure such as 5G, Engineering and Construction, Materials.
 - Infrastructure Resources: Beneficiaries benefiting from increased demand for commodities exhibiting supply-demand constraints.
- Providers will likely see a multi-year tailwind from spending driven by replacement and update needs.

Megatrend: Technological innovation

Example of a Theme: Intelligent machines

- The intelligent machine theme invests in companies that provide robotics and automation solutions and supporting software.

- More efficient operations, supply chain optimization and demand for better quality products will be important drivers for the Intelligent Machines theme for years to come.

Megatrend: Resource scarcity

Example of a Theme: Next generation energy

- The theme invests in enablers of cleaner energy generation and efficient energy storage and sustainable energy consumption.
- A new generation of leaders are taking over, willing to fund “The Green Deal” as decarbonization and acting on clean air standards is becoming the consensus.

- At its heart is the need to reduce energy-related CO2 emissions to limit climate change.
- Energy can now be stored whenever production outweighs consumption and distributed later, whenever demand surges.

Source: Allianz Global Investors, 2022.

Megatrend: Demographic and social change

Example of a Theme: Health technology

- The theme invests in companies that stand to benefit from technological improvements in health care.

- Digitalization has already transformed shopping, booking and banking. The health care sector, however, is still operating mostly on paper.
- This is starting to change as hospitals, health care insurance companies and practitioners are making use of, and upgrading, digital technology to lower their costs and allow for quicker and more targeted treatment.

Three reasons to invest in the Target Fund

- 1 Actively managed to stay ahead of the curve**
Participate in structural shifts by investing in the most exciting themes of our era. The Target Fund uses Allianz Global Investors’ expert research capabilities to actively manage both the selection of themes as well as the stocks within each theme.
- 2 Diversified, adaptable and robust**
The Target Fund’s strategy is more diversified than the single theme strategies, as it invests across several themes. Furthermore, themes within the portfolio will change with time and theme composition will constantly adapt as new themes emerge and older themes peak.
- 3 No constraints: greater growth potential**
Participate in structural shifts without any constraints. Thematic investing is unconstrained by region, sector or market cap, and views companies simply as either winners or losers with regard to the trend.
